Pepijn AI (Doctoral student, University of Western Ontario) presents as the fourth speaker for the Ethics Center's 2020-21 series, Models for Equitable Minority Inclusion in Institutional Research. Previous speakers included Omega Wilson, Alex Pearlman, and Angelique Harding.

About the Series: Because citizen science work often operates outside of institutional channels, it often faces difficulties when it intersects with institutional structures, often disproportionately hurting minoritized communities and those not traditionally served by academic and institutional research models. In this series, we explore this intersection with an aim of understanding how community participation can be made more equitable and just.
